

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 77-80, and 89-92 are rejected under 35 U.S.C. 102(b) as being anticipated by "Noninvasive Estimation of Cardiac Output", Welkowitz et al.. Welkowitz establishes a timing relationship using a carotid pressure and femoral pressure (cardiac contraction) over the evolution of several pulse to establish a measured transfer function as well as well as a model transfer function as a dynamical property. Cardiac Output is estimated therefrom. The sampling Used requires the use of an a/d converter and the use of an FFT requires the use of a buffer system. A display device is shown in fig. 4.

Allowable Subject Matter

Claim 85-88, 97-100 are allowed.
